- Production and procurement
- Installation of all types of facade and fencing systems
- Logistics and project execution in Serbia and the region
- Project management and timely reporting
- Consulting and supervision during installation of facade and fencing systems

Glass railing systems

A modern solution for residential-commercial buildings, hotels, banks, and commercial spaces.

With a minimalist design and high quality, they provide maximum transparency and safety - no compromise between aesthetics and functionality. Ideal for both indoor and outdoor use, adding an elegant look to any space.

Metal railing systems

Our metal railing systems combine durability, safety, and modern design. Perfect for enclosing residential and commercial buildings, yards, terraces, and public spaces.

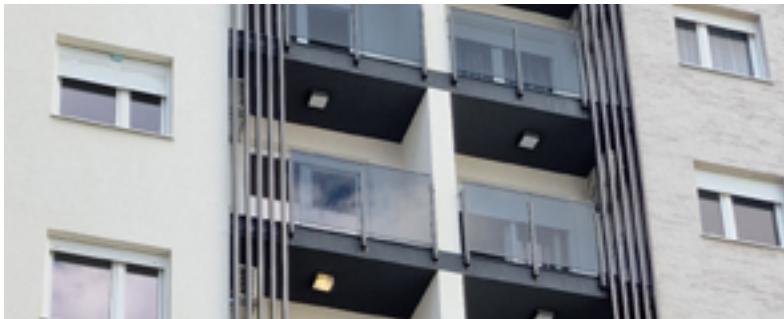

Made from high-quality weather-resistant materials, they offer long lifespan and customization options to suit the aesthetic requirements of your project.

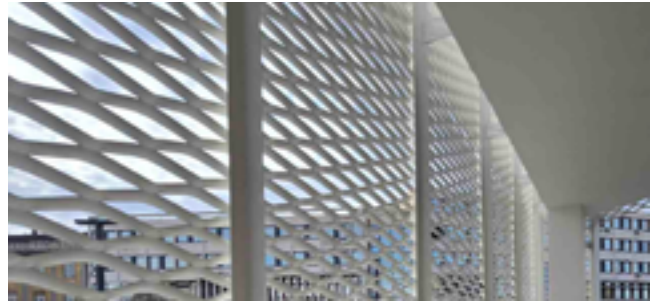

Metal brise-soleil systems

Installed on residential and commercial facades, they enhance energy efficiency and give buildings a modern appearance. Available in various sizes and finishes, fixed or movable depending on project needs.

Expanded metal panels for facades and interiors

Expanded metal panels offer a contemporary solution that combines aesthetics, functionality, and ventilation. Suitable for external facades and interior wall cladding, they bring a dynamic, industrial look to any space.

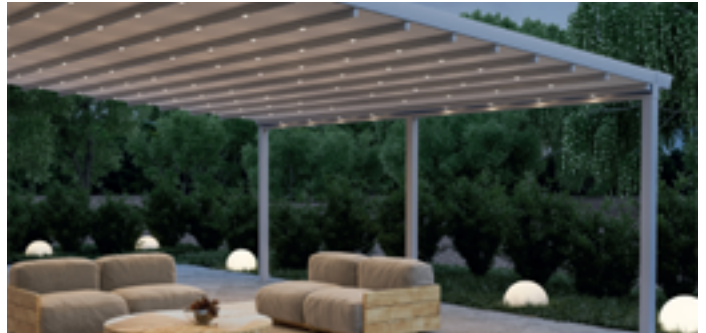

Perforated metal panels for facades and interiors

Perforated metal panels provide a modern and flexible option for facade and interior design. Thanks to a wide variety of patterns and perforations, they allow control of light, ventilation, and visual dynamics ideal for projects requiring strong visual identity.

Aluminum bioclimatic pergolas

Bioclimatic pergolas are innovative solutions for outdoor protection, enabling natural control of light, ventilation, and temperature.

With movable slats and modern technology, they offer year-round comfort regardless of the weather.

Glass wall panels

Glass wall panels are an elegant way to organize space without losing light or openness. Perfect for offices, commercial spaces, as well as modern residential interiors.
